

EUROGROW'S CBD NEWSLETTER

Issue 1 | Date: March 29, 2019

PROGRESS

Since signing the LOI in October of last year, the company has been hard at work planning, consulting, and engaging with the many stakeholders involved in this venture.

As a result of our growing relationship with the farming Co-Op and the farmers themselves, we have made great progress towards our goal of having seeds in the ground in Q2 19'

CONTRACT

Management is excited and pleased to announce the contract with the Co-Op & farmers has been finalized.

This contract grants the company to convert 100 hectares of pristine farmland in Tuscany, Italy from tobacco to hemp cultivars using organic, non-GMO seeds.

BEYOND

As the company scales, the contract also provides an additional 5000 hectares of farmland on some of the most nutrient-rich and sought after soil in the world.

We look forward to sharing many more updates as we continue to execute on this European CBD opportunity!
